**Microsoft** | **Power BI**
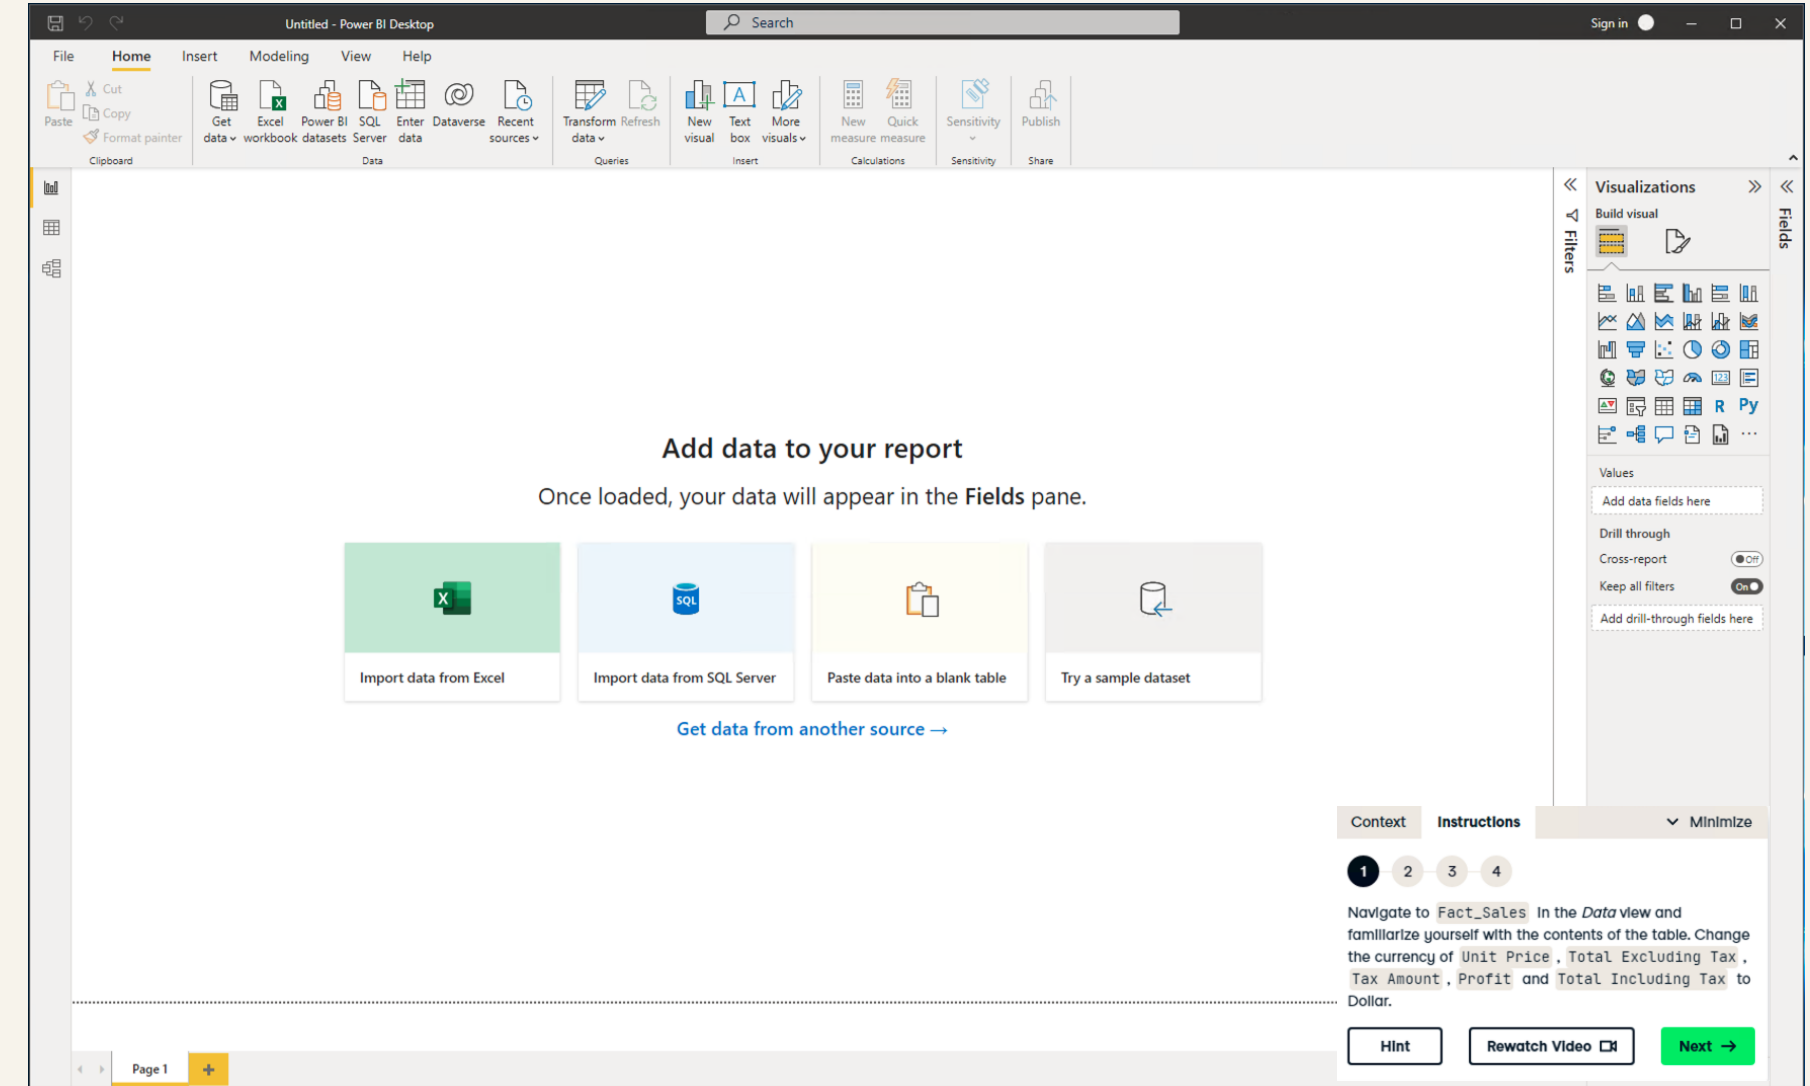

datacamp

Data Analyst in Power BI

💡 There are two ways to complete a course:

1 | Take the course on DataCamp

Power BI on a Datacamp virtual machine in your browser.

1. Follow the instructions to complete the exercises.

2. That's it. Everything is prepared for you here in the browser!

2 | Take the course on your local machine

Power BI on your local machine.

1. Make sure you have Power BI Desktop installed, or download it here.

2. Download the exercises and datasets from the course overview page. Follow the instructions on DataCamp.

ⓘ Note Power BI is only supported by the Windows operating system.

We're working hard to improve the experience of both methods. **Stay tuned!**
