KNIME Analytics Platform on DataCamp
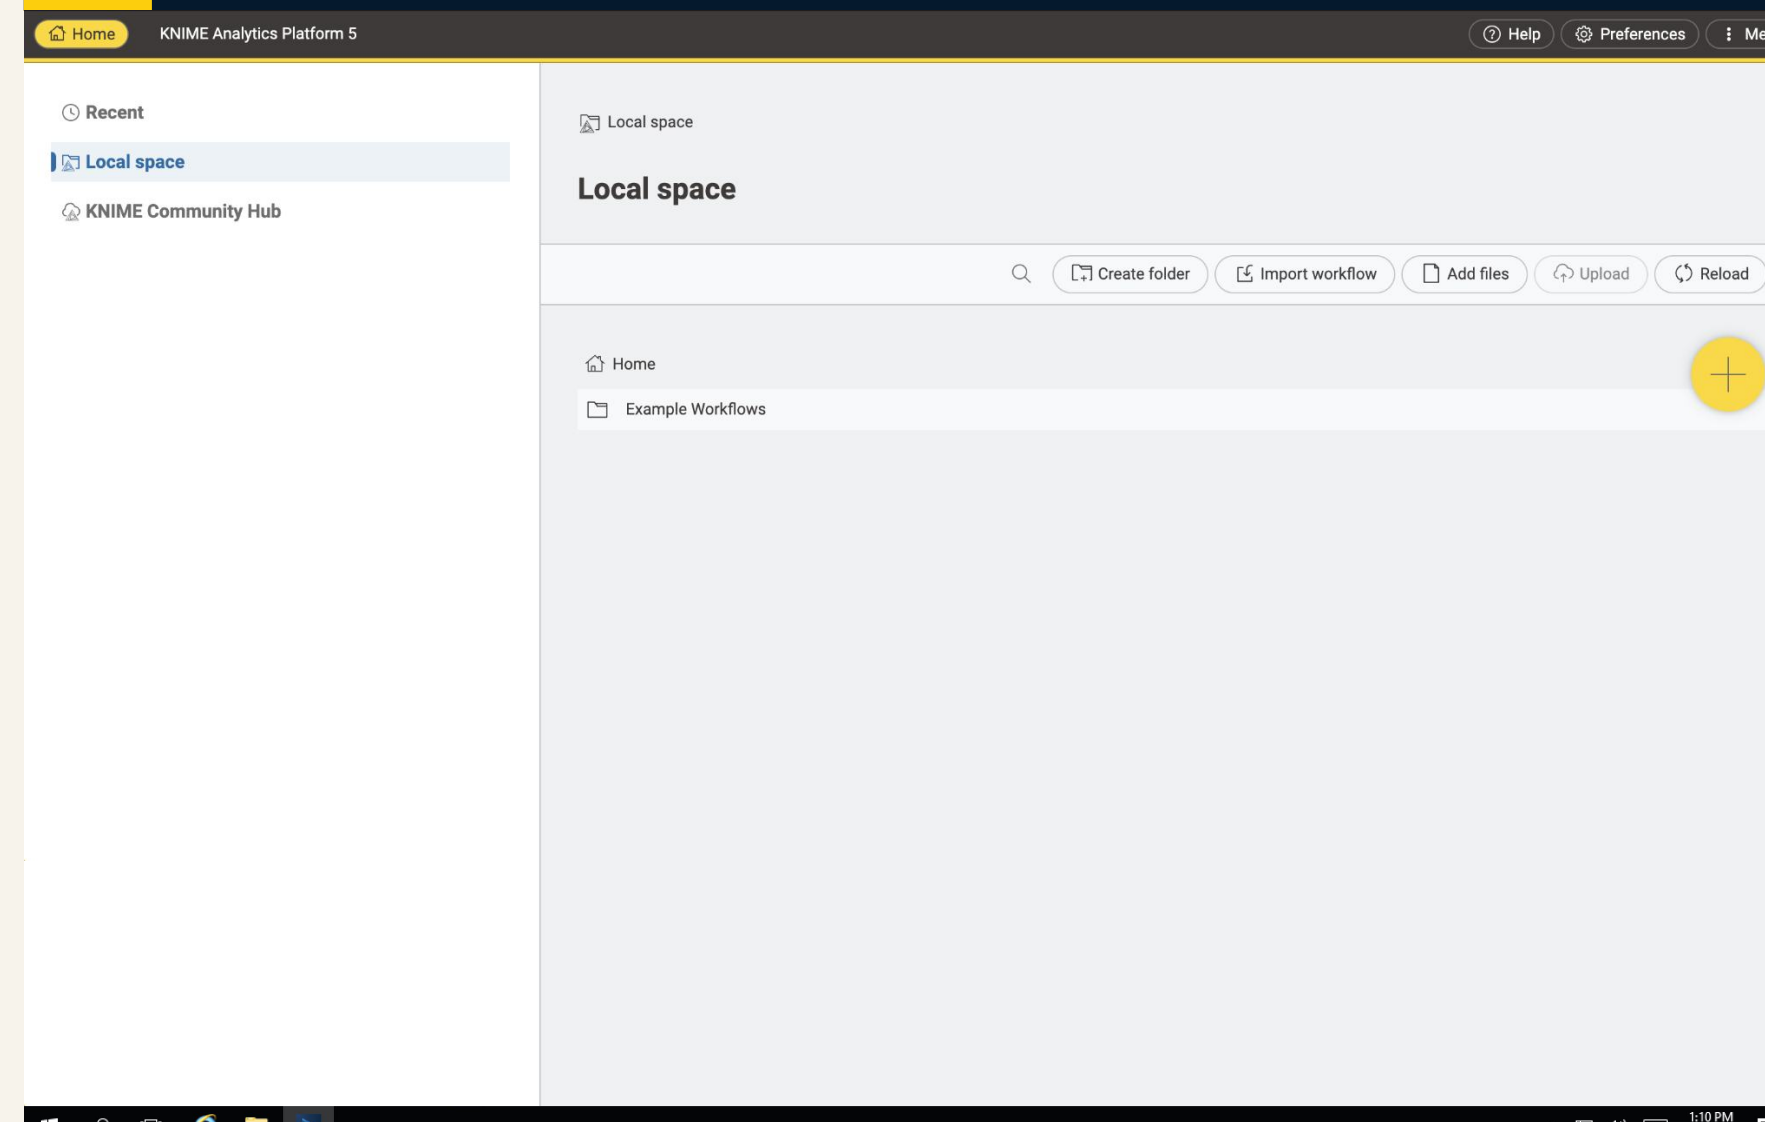

💡 There are two ways to complete a course:

1 Take the course on DataCamp

KNIME Analytics Platform on a DataCamp virtual machine in your browser.

1 Follow the instructions to complete the exercises.

2 That's it. Everything is prepared for you here in the browser!

2 Take the course on your local machine

KNIME Analytics Platform on your local machine.

1 Download and install the latest version of KNIME Analytics Pltform from **here**

2 Download the archive file from the Exercises and Datasets section on the course overview page.

3 Go to Local Space and click the button Import workflow

4 Browse and select the .knar file downloaded before

We're working hard to improve the experience of both methods. **Stay tuned!**
